

Welcome to your PRO Series Custom Imaged Controller. We want to thank you for choosing Modjunkiez for your E Sports needs.

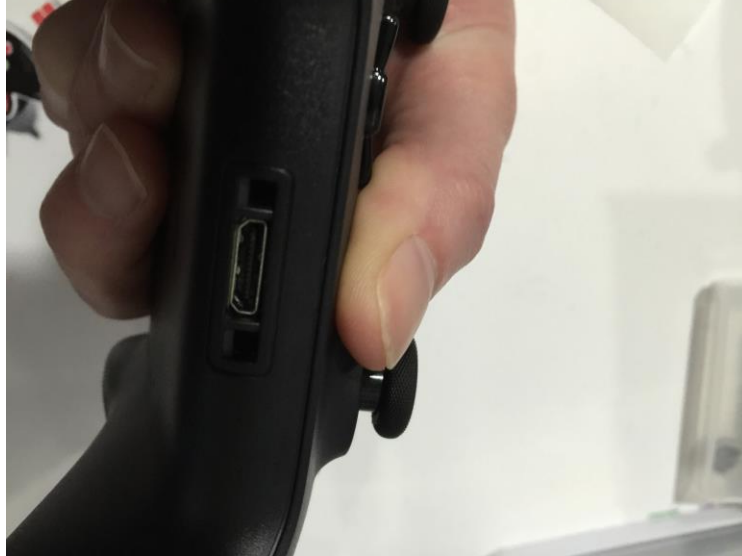

Due to the many different types of headphones and chat adapters and the Thickness of the custom imaging on the controller you may need to do the following to ensure your chat adapter has proper connection each time. **Failure to do so can result in your chat pad not attaching to the controller properly. As well as damage to your audio port on the controller.**

Below are images to show you exactly what you should do to connect your chat adapter properly.

1. Push down Firmly on top of the controller where shown.

2. While still pressing down on top of the controller you will insert your chat adapter. Ensure you have it set properly and not moving around. Make sure you latch on the back of the shell properly.

Once chat set is seated. You are ready to go. Enjoy your new pro series controller from www.modjunkiez.com
